

# Listen with more intelligence.

LITTLERICHARD

**From computer modems to the newest MP3 players, ST microchips are the brains behind the latest ways to enjoy music.**

Whether it's *Tutti Frutti* or *Beethoven's Ninth*, the digital revolution has forever changed how we listen to music. And ST is a star performer in the process.

ST supplies microchips for computer modems, sound cards, solid state and hard disk storage devices, active loudspeakers, and portable MP3 players.

People want better access to music, and ST is listening.

**We put more intelligence into everything.**

STMicroelectronics (formerly SGS-THOMSON) • [www.st.com](http://www.st.com) • A world leader in semiconductors for consumer products, automotive, telecommunications, computer peripherals, industrial automation and control systems • For opportunities: <http://jobs.st.com>
